New Delfino

Dati tecnici della pompa idrostatica per fanghi DELFINO

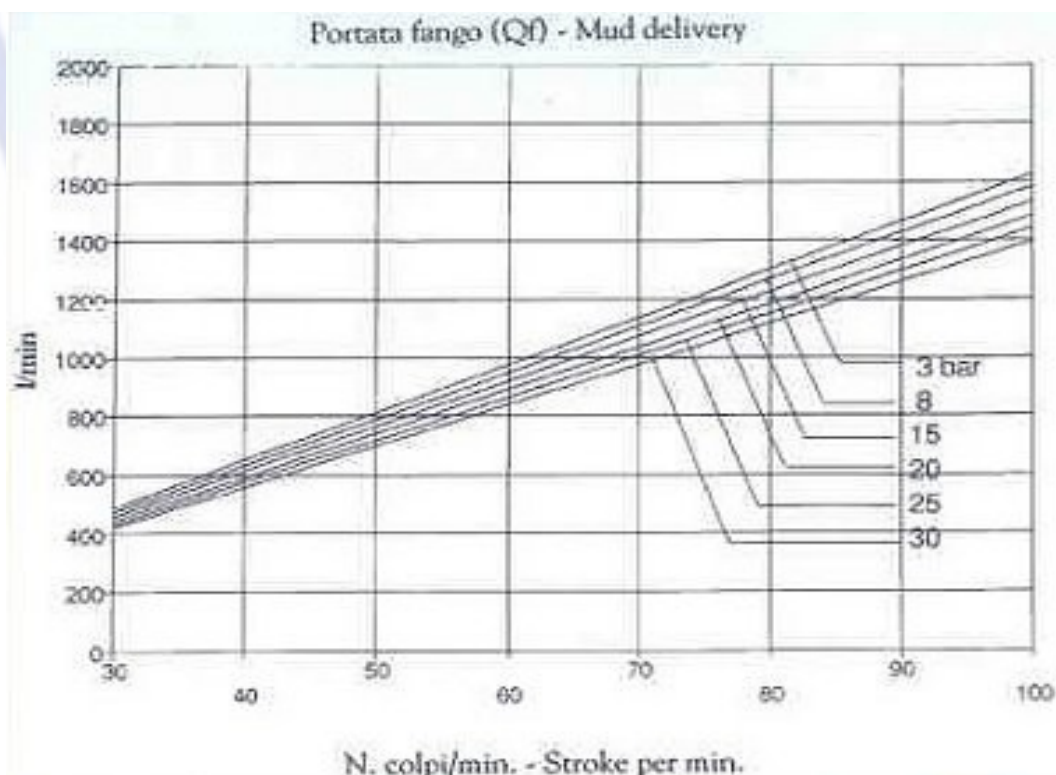

- La struttura è interamente di acciaio.
- Non sono presenti camicie, pistoni, ingranaggi, alberi, cuscinetti e olio lubrificante.
- I tappi delle valvole sono dotati di un sistema meccanico facilmente apribile per l'ispezione delle valvole.
- Le valvole sono di tipo a sfera di facile sostituzione (valvole a fungo su richiesta)

Delfino hydrostatic pump technical data

- Heavy duty body totally made on steel.
- There aren't liners, pistons, gears, shafts, bearings and lubricant oil.
- Valve covers are fixed with a fast open device in order to check the valves.
- Easy maintenance ball valves are inside (wings valves are available).

Caractéristique technique de la pompe hydrostatique Delfino

- La structure est entièrement en acier.
- Il n'y a pas des chemises, pistons, éngrenages, arbres, roulements et huile de lubrication.
- Les couvercles de soupapes sont fixés avec un système d'ouverture facile pour un contrôle rapide des vannes.
- Ils sont prévu des vannes à sphere pour une éntretienne facile (soupapes sont optionelles).
